Rajendra Shivanna

has successfully completed the online Professional Certificate

Microsoft Generative AI Engineering

The Microsoft Generative AI Engineering Professional Certificate helps you gain expertise in building, fine-tuning, and deploying generative AI models. You will master leveraging Microsoft's ecosystem, including Azure AI Foundry, Azure Machine Learning, and Azure OpenAI Service, to create scalable AI solutions. This certificate signifies your robust skills in core generative models, working with Large Language Models, integrating multimodal AI, and applying MLOps and responsible AI practices, preparing you to develop cutting-edge AI applications and transition into specialized AI roles.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
